

**Technical data coolant recycling collector 1000 KW-FK**

Large coolant recycling collector mounted on a special, deep-seated chassis, automatic back-fill system, inclusively robust grid with slosh-baffle. Can be used under the car (in the pit) or on the floor. For handling and filtration of the coolant.

**Also available in 24 V version for external use**

Technical data	1000 KW-FK
Filling capacity	approx. 80 liter
Movable volume without risk of overflowing	approx. 50 liter
Delivery pump head	4 m
Flow rate	~ 8-10 l/min
Filter	25 µm
Power specification	1P-N-PE/230V/50Hz
Dimensions (LxWxH)	930 mm x 630 mm x 220 mm
Power	0,35 KW
Load capacity	80 kg
Level control	Electronic
