

## Series 1000 SR with stainless steel collector option 1000 EW

Optionally the series 1000 SR can also be equipped with a stainless steel collector ..... **Option 1000 EW**

The collector can be easily cleaned, is more robust and less sensitive to shocks and impacts.

Sedimentation concept remains in effect.

The outside dimensions are identical, thus accessories such as makrolon hood 1000 MA or three-side splash guard 1000 SP can be used from the existing specification.

Retrofitting of existing devices with corresponding adaptation is possible.

Option 1000 EW  
Option 1000 EW-NR

Option new machine  
Option for retrofitting of  
units from October 2017  
(grey collector)
